CH-04

AN IDEAL HOME

Tick the correct option:

1. **Where does Ayesha live?**

[ ] In a mansion in Bhogpur

[*] In a small house on the outskirts of Begampur

[ ] In a big city in Uttar Pradesh

[ ] Near the main gates of a village

2. **What type of roads are there in Begampur?**

[ ] Pucca roads

[ ] Metalled roads

[*] Katcha (unsurfaced) roads

[ ] Concrete highways

3. **Where do Ayesha's neighbours throw their garbage?**

[ ] In the uncovered drains

[ ] On the streets

[*] In a deep pit covered with soil

[ ] Near the main gates

4. **What is the garbage in Ayesha's village converted into?**

[ ] Plastic

[ ] Pollution

[*] Compost

[ ] Chemicals

5. **Where does Neerad live?**

[*] In a mansion in village Bhogpur

[ ] In a small township in Begampur

[ ] On the outskirts of Uttar Pradesh

[ ] In a house with a chimney

6. **Why do the villagers in Bhogpur have to cover their noses when passing the streets?**

[ ] Because of the smoke from chimneys

[*] Because of a huge pile of stinking garbage

[ ] Because of fresh paint on the houses

[ ] Because of the dust from katcha roads

7. **What breeds on the garbage piles in Neerad's village?**

[ ] Earthworms

[ ] Butterflies and bees

[*] Flies and mosquitoes

[ ] Birds

8. **According to the te*t, the size, location, or cost of building a house is not as important as:**

[ ] The number of rooms it has

[*] Maintaining the house and the neighbourhood

[ ] Having a big mansion

[ ] Buying e*pensive furniture

9. Why is sunlight necessary for an ideal home?

[ ] It keeps the house dark

[*] It brightens our home and keeps the rooms dry and germ-free

[ ] It creates more space

[ ] It keeps the house cold

10.Sunlight is a rich source of which vitamin?

[ ] Vitamin A

[ ] Vitamin C

[*] Vitamin D

[ ] Vitamin K

11.Why should windows and doors face each other?

[ ] For security purposes

[*] To allow free flow of fresh air and outlet of dirty air

[ ] To let people look outside easily

[ ] To block the sunlight

12.**What helps in keeping an ideal house free from odour and pollution?**

[ ] A spy eye

[ ] Curtains

[*] A chimney or an e*haust fan

[ ] Fly mesh on doors

13.Why should drains be covered and cleaned regularly?

[ ] To store water

[*] To prevent the breeding of flies, germs, mosquitoes, and cockroaches

[ ] To decoration purposes

[ ] To make the roads look beautiful

14.Proper drainage protects us from diseases like:

[*] Malaria, dengue, and cholera

[ ] Cough and cold

[ ] Vitamin deficiency

[ ] Heart disease

15.Why should a good house have fly mesh (wire-net) doors and windows?

[ ] To block the view of strangers

[*] To keep flies and mosquitoes away while allowing fresh air

[ ] To keep the rooms dark

[ ] To prevent rainwater from entering

16.**What can happen if drinking water is stored in unhygienic surroundings?**

[ ] It becomes tastier

[*] It can lead to diseases

[ ] It turns into compost

[ ] It evaporates quickly

17.What is the purpose of a 'spy eye' on a main door?

[ ] To let sunlight enter

[*] To ensure that the door is not opened to strangers

[ ] To allow fresh air ventilation

[ ] To hang decorations

18.Why should the drains from bathrooms and kitchens slope?

[ ] For good design

[ ] To look nice and maintain privacy

[*] For an efficient system of cleaning

[ ] To block cockroaches

19.**Why should we separate items that can be reused or recycled?**

[*] To reduce the amount of garbage

[ ] To make the piles of garbage bigger

[ ] To throw them into the drains

[ ] To keep them in the kitchen

20.What creates a friendly environment according to the te*t?

[ ] Throwing waste near main gates

[ ] Building huge mansions

[*] Cooperation, sharing, and caring

[ ] Leaving drains uncovered

Fill in the Blanks:

1.Ayesha lives in a small township of Begampur in Uttar Pradesh.

2.In Ayesha's village, the roads are katcha and the drains are uncovered.

3.Garbage thrown in a deep pit and covered with soil converts into compost.

4.Neerad lives in a mansion in village Bhogpur.

5.Flies and mosquitoes breed on the open garbage piles in Bhogpur.

6.A simple house can be converted into an ideal home if we take care of it.

7.Sunlight is a rich source of Vitamin D, which strengthens our bones.

8.Ventilation ensures the outlet of dirty air from the home.

9.An ideal home should have a chimney or an e*haust fan to let the smoke out.

10.Drains should be covered and cleaned regularly to prevent the breeding of cockroaches (or flies/germs/mosquitoes).

11.The dustbin should have a lid and it must be cleaned everyday.

12.A good house should have two doors—a wooden door and a wire-net door.

13.Storage tanks for water must be cleaned at regular intervals.

14.The main door must have a spy eye to ensure that the door is not opened to strangers.

15.There should be a wall or fence all around the house to keep animals and strangers out.

16.The doors and windows should have curtains to look nice and maintain privacy.

17.Floors should be wiped with disinfectant everyday.

18.Cleanliness keeps the house neat, tidy and saves a lot of time.

19.A clean home and a neighbourhood require an efficient system of garbage disposal.

20.We should live in harmony inside our home and with our neighbours.
